

HIGHLY PATHOGENIC AVIAN INFLUENZA (HPAI)

**** UPDATE ****

**** Enhanced surveillance required in NZ ****

Farmers are the **frontline surveillance** for symptoms of avian influenza among your flocks.

• **MONITOR FOR:**

- ✓ Sudden, unexplained deaths
- ✓ Rapid spread of the disease throughout the flock
- ✓ Depression and loss of appetite
- ✓ A drop in egg production
- ✓ Anxiety
- ✓ Facial swelling
- ✓ Coughing, sneezing and diarrhoea

• **REPORT:**

- ✓ If any of these symptoms appear, you **must** call:
The MPI Exotic Pest and Disease hotline – **0800 80 99 66**

• **PREVENT:**

- ✓ It's introduction and spread by reviewing and improving your biosecurity

• **PROTECT:**

- ✓ Do not handle sick poultry without veterinary or MPI supervision

• **WHY:**

- ✓ To protect your flock
- ✓ To protect your commercial operations
- ✓ To avoid the implementation of trade restrictions

The faster you act, the faster the risk can be
Identified, Contained and Controlled
